Impact of the Boko Haram Insurgency on the Child's Right to Education in Nigeria

AJ Isokpan and E Durojaye*

Abstract
This paper is focused on the impact of the Boko Haram insurgency in Nigeria on the child's right to education. The article concludes by assessing how the Nigerian government has lived up to its obligations under international law to ensure the realisation of the child's right to education in the face of the insurgency in the North-eastern part of the country. Concrete recommendations are made to the Nigerian government with regard to addressing the impact of the insurgency on the rights of the child.

Keywords
Armed conflict; Boko Haram; children's rights; civilian joint task force (CJTF); counter-insurgency; education; humanitarian assistance; insurgency; internally displaced persons.
1 Introduction

Armed conflict affects the entire populace but it makes a special impact on children as a vulnerable group.\(^1\) They are made to pay the price for a war that is not of their making, hence losing out on the beauty of childhood as they to grow up among families and communities torn apart by armed conflicts, or even partake in the conflicts as child soldiers.\(^2\) They are exposed to human rights violations as the conflict affects the provision of services, including food, health, education and infrastructure, and also affects adults who are significant to the children, such as fathers, mothers and siblings.\(^3\) Often children are separated from families and loved ones, left to face the harsh effects of conflict as refugees or internally displaced persons, and suffer from hunger and disease as a result of the tactics of the combatants to disrupt the supply of food.\(^4\)

Children in Nigeria have experienced their fair share of the insurgency ravaging the north-eastern part of the country. Some children have been killed, abducted, forcefully recruited, and internally displaced, while others have sought refuge in neighbouring countries.\(^5\) Throughout 2014 the armed conflict in north-eastern Nigeria was one of the world's deadliest for children.\(^6\) Education was profoundly affected as a result of the targeted attacks on school children, teachers, schools and other education facilities.\(^7\)

This paper considers the effect of the Boko Haram\(^8\) insurgency in Nigeria while focusing on its impact on the child's right to education. It considers

\(^8\) This Hausa phrase translates as "western education is a sin". "Boko" in the Hausa language means education, while "Haram" in Arabic means forbidden. The Boko
the normative framework for the right to education under international and regional human rights instruments. It then discusses the child's right to education in Nigeria. This section of the paper is followed by a discussion on the impact of armed conflict on the right to education of the child in the context of the Boko Haram insurgency in Nigeria. The paper also considers the effectiveness of the steps taken by the Nigerian government to secure children's right to education in line with its obligations under international law, in the context of the insurgency. And finally, recommendations are made to the Nigerian government with regard to addressing the impact of the insurgency on the rights of the child.

2 The child's right to education

Fafunwa describes education as the aggregate of all processes through which a child develops abilities, attitudes and other forms of behaviour which are of a positive value to society. Education enables individuals to acquire appropriate knowledge, values and skills for personal development and also contributes meaningfully to the development of society. Education was declared a basic human right for every individual in the Universal Declaration of Human Rights and this has been reaffirmed in the International Covenant on Economic, Social and Cultural Rights (1966) (ICESCR), the Convention on the Rights of the Child (1989) (CRC), the African Charter on Human and Peoples' Rights (1981), the African Charter on the Rights and Welfare of the Child (1990) (ACRWC) and the Protocol to the African Charter on Human and Peoples' Rights on the Rights of Women in Africa (2003) (African Women's Protocol), amongst other international and regional human rights instruments.

Drawing on articles 13 and 14 of the ICESCR, which make a comprehensive provision for the right to education, article 28 of the CRC recognises the right of the child to education. With a view to achieving this right progressively and on the basis of equal opportunity, states are required to make primary education compulsory and available free to all;
to encourage the development of different forms of secondary education; to offer financial assistance in case of need, as well as to take measures to encourage regular attendance at schools and the reduction of drop-out rates. Article 29 of the CRC details the aims of the education of the child, which is directed at preparing the child for a responsible life in a free society, amongst other things.

In the African context, article 11 of the ACRWC contains provisions similar to those of article 28(1) of the CRC, though it does not require a progressive realisation of the right.\(^\text{16}\) Considering the precarious position of the girl child in accessing education, the *African Women's Protocol* requires State Parties to eliminate all forms of discrimination in the provision of access to education,\(^\text{17}\) and to promote the enrolment and retention of girls in school.\(^\text{18}\)

The right to education guaranteed under the ICESCR, CRC, ACRWC and other international instruments is not suspended in situations of armed conflicts, as states have the obligation to respect, protect and fulfil the right whether or not an emergency situation exists.\(^\text{19}\) Concerned about the consequences of brutal armed conflicts for education, Vernor Munoz,\(^\text{20}\) former Special Rapporteur on the Right to Education, noted in his report that “security in schools”, which includes an uninterrupted education in conditions conducive to knowledge acquisition and character development, forms part of the right to education.

Under international humanitarian law, during armed conflict, whether international or non-international, children benefit from the general protection provided for civilians who are not taking part in hostilities.\(^\text{21}\) The *Fourth Geneva Convention* (1949) (GCIV 1949)\(^\text{22}\) and the *Additional Protocols* of 1977 (AP1\(^\text{23}\) and AP2\(^\text{24}\)) lay down rules according special

protection to children. Article 77 of AP1 requires that children be protected from indecent assault, and parties to conflict must provide them with the care they require.

Article 38 of the CRC requires states to respect the rules of international humanitarian law in armed conflicts, which are relevant to the child,\textsuperscript{25} and to take all feasible measures to ensure the protection and care of children who are affected by armed conflict.\textsuperscript{26} Article 22 of the ACRWC contains a similar provision and requires that children must be protected from abuse and from participating in hostilities.\textsuperscript{27}

With regard to education, the GCIV 1949 in article 24 (1) requires parties to conflict to ensure that children under fifteen who are orphaned or separated from their families as a result of war have access to education.\textsuperscript{28} In the case of occupied territories, article 50 requires the occupying power with the co-operation of the national and local authorities to facilitate the proper working of all institutions devoted to the care and education of children. With regard to internees, article 94 provides that children and young people must be allowed to attend schools either within the place of internment or outside. In addition, the AP1 provides in article 78(2) that an evacuation must take account of the need for continuity in a child's education.

In situations of displacement, children leave the place where they have access to school and go to a place where they have no access to education. Hence, the United Nations Guiding Principles on Internal Displacement (1998)\textsuperscript{29} in principle 23 requires the concerned authorities to ensure that internally displaced children receive free and compulsory education which should respect their cultural identity, language and religion. Special efforts must also be taken to ensure girls' participation.\textsuperscript{30} Also, the African Union Convention for the Protection and Assistance of Internally Displaced Persons in Africa (Kampala Convention)\textsuperscript{31} requires

State parties to provide internally displaced persons, including children, with adequate humanitarian assistance such as food, water, shelter, medical care, sanitation, education and other necessary social services, and in appropriate cases to extend such assistance to host communities.\textsuperscript{32}

3 \textbf{Child education in Nigeria: an overview}

The \textit{Constitution of the Federal Republic of Nigeria}, 1999 (as amended) (CFRN 1999) does not guarantee an enforceable right to education, but draws the attention of the government to it in Chapter II as a Fundamental Objective and Directive Principle of State Policy. Section 18 provides that government shall direct its policy towards ensuring the availability of equal and adequate educational opportunities at all levels. The government is required to strive to eradicate illiteracy by providing as and when practicable free, compulsory universal primary education; free secondary education; free university education and a free adult literacy programme.\textsuperscript{33}

The rights contained in Chapter II of the \textit{Constitution}, which include the right to education, are however stated to be non-justiciable but are merely objectives to guide government policies.\textsuperscript{34}

The principal law protecting the rights of children in Nigeria, the \textit{Child's Right Act}, 2003 (CRA 2003), in section 15 guarantees the child's right to free, compulsory and universal basic education, which the government has a duty to provide. Also, the \textit{Compulsory, Free Universal Basic Education Act}, 2004 (UBE Act) addresses the issues of access, equality, equity, inclusiveness, the affordability and the quality of basic education.

Basic education, which is structured in the National Policy on Education (NPE) document of 1977 (last revised in 2013),\textsuperscript{35} largely caters for children. It is considered important as it serves as the foundation upon which the pursuit of higher education is built, and is hence made the centre piece of educational policies by successive governments in Nigeria.\textsuperscript{36} A commendable strategy in fulfilment of the objectives of basic education in the NPE\textsuperscript{37} is the Universal Basic Education (UBE) scheme.

\textsuperscript{32} Article 9(2)(b) of the Kampala Convention.

which was put in place to enhance the success rate of the first nine years of schooling. This initiative is aimed at eradicating illiteracy, ignorance and poverty, and facilitating national development.\footnote{38} The UBE programme is a strategy adopted by Nigeria to meet the Education for All (EFA) agenda and the Millennium Development Goals (MDGs) with respect to child education.\footnote{39} The scope of the UBE scheme covers formal basic education, nomadic education, literacy and non-formal education. Formal basic education covers the first nine years of schooling, nomadic education is offered to the school-age children of pastoral farmers, while literacy and non-formal education are programmes for out-of-school children and illiterate adults.\footnote{40}

4 The impact of armed conflict on education

According to Graca Machel,\footnote{41} attacking schools during armed conflict is a grave violation of children’s rights. Such attacks are mounted against students, teachers and other education personnel. They include the killing, abduction, kidnapping, illegal detention, torturing, sexual abuse of and forced recruitment of school children and teachers, and result in the violent denial of children’s right to access to education. Such attacks also involve damaging educational buildings and other facilities, occupying school buildings for military purposes, initiating violent attacks on educational activities such as attacks on convoys carrying examination papers, and prevention of the repair, rehabilitation or reconstruction of schools already attacked.\footnote{42}

Under international humanitarian law, schools are protected civilian objects and therefore benefit from the humanitarian principles of distinction and proportionality.\footnote{43} The targeted attacks at schools during conflict and the general state of insecurity could force them to close down. This has the effect of depriving millions of children of their right to education and therefore the ability to realize their potentials.\footnote{44} Condemning such grave violations of children's rights, the United Nations Security Council (UNSC)

in Resolutions 1998 (2011),\textsuperscript{45} 2143 (2014)\textsuperscript{46} and 2225 (2015)\textsuperscript{47} urges parties involved in armed conflict to refrain from actions that impede children’s access to education.\textsuperscript{48}

Jones and Naylor\textsuperscript{49} have noted several ways in which armed conflict can affect education. These include, among others, school closure due to targeted attacks; collateral damage and the military use of school buildings; death and injury to teachers and students; the fear of sending children to school and teachers’ fear of attending school due to their being threatened with targeted attacks; general insecurity reducing the freedom of movement; the forced recruitment of teachers and students by armed forces (state and non-state); forced population displacement interrupting education; and the public health impacts of conflict, which reduce the possibility of access and learning.\textsuperscript{50} These disruptions have the effect of preventing access to education and diminishing the quality of the learning experience.\textsuperscript{51} Even where educational opportunities exist, parents worried about the safety of their children may be reluctant to send them to school.\textsuperscript{52} In 2014, conflict in the Democratic Republic of Congo kept over 31 000 children out of school in response to the attacks that had taken place on 22 schools, of which 12 were thereafter used for military purposes.\textsuperscript{53}

Also, O’Mally\textsuperscript{54} has noted the longer term impacts of armed conflict on education as a result of the occurrence of persistent attacks over a number of years and the use of force to prevent recovery from such attacks. Such long-term effects include the reduced enrolment and permanent drop-out of students and the withdrawal of educational personnel leading to a shortage of teachers; and the general impact of

\textsuperscript{54} O’Mally Longer-Term Impact of Attacks on Education Systems 5-6.
armed conflict on the government’s resources reduces the government’s capacity to manage or deliver education.\textsuperscript{55} As a result, conflict-affected areas have some of the world’s worst indicators for education, as millions of children are deprived of their only chance of the schooling that could transform their lives.\textsuperscript{56} Armed conflict also poses a problem for states in the implementation of the EFA and MDGs with regard to universal primary education.\textsuperscript{57}

The exposure of children to traumatic events such as the loss of loved ones, displacement, a lack of food, and the interruption of school associated with armed conflict has detrimental consequences for their mental health and psychological well-being.\textsuperscript{58} Children are affected by Post-Traumatic Stress Disorders (PTSD) such as irritability, insomnia, sleeping disorders, fear, aggression, confusion and an inability to concentrate,\textsuperscript{59} which greatly affects their ability to have a loving relationship with their family and friends and to perform well in school. In a study conducted on 796 children living in the occupied West Bank and Gaza, an area affected by armed conflict, they were found to have behavioural and psychological problems such as depression and fears, to have a tendency to be disobedient and to engage in fighting, and to suffer from sleep disturbances, nightmares and low self-esteem.\textsuperscript{60} It was discovered that children in Sri Lanka who suffered traumatising experiences during the prevalent armed conflict suffered from PTSD, and both their memory tests and their school grades demonstrated a significant impairment of their cognitive development.\textsuperscript{61} It has also been shown that children of school age in Rwanda exposed to the 1994 genocide experience had a drop in educational achievement.\textsuperscript{62}

Given that the environment has an influence on development, on learning and other aspects of behaviour, a society characterized by any form of violence will not be conducive for social interaction in the form of teaching and learning.\textsuperscript{63} Violence can affect students' performance in school as insecurity constitutes a negative reinforcement due to the obvious fact that teaching and learning cannot successfully occur in an environment of

fear.\textsuperscript{64} Also, war not only destroys lives and schools, but it also diverts resources from education to the military.\textsuperscript{65} While spending on defence provides security which sustains a stable business environment, it consumes resources that could be put to more productive use.\textsuperscript{66}

5 The impact of the Boko Haram insurgency on the child's right to education in Nigeria

5.1 Effect on school attendance

According to Oladunjoye and Omemu,\textsuperscript{67} attendance at school is dependent on the readiness of the child, encouragement from parents, the provision of school materials, the distance to school and, very importantly, the security of the child. The present state of insecurity in the North Eastern region of Nigeria has been traumatic for children as they are forced to flee from their homes in fear, to witness killings, or to live as displaced persons or refugees.\textsuperscript{68} UNICEF reports that as a result of the incessant attacks on schools, school children and teachers,\textsuperscript{69} over one million children have been forced out of school,\textsuperscript{70} while their teachers have also been forced to stay away from school.\textsuperscript{71} Some schools have been forced to shut down and the deserted school buildings have been converted into shelters for internally displaced persons.\textsuperscript{72} The children who were supposed to populate the schools have either sought refuge along with their families in neighbouring countries or have been internally displaced, as over 1.4 million children have been forced to flee the north-eastern region.\textsuperscript{73}

The attacks by the insurgents have led to the deaths of many children. In July 2013 the insurgents invaded a government-owned boarding school in Mamudo village in Yobe state, killed 42 students and teachers and burnt down the school.\textsuperscript{74} On 25 February 2014 the insurgents invaded Federal

Government College, Buni Yadi, Yobe State and gruesomely murdered about 59 students and burnt several buildings in the school.\textsuperscript{75} In November 2014 a suicide bomber entered a secondary school by disguising himself as a member of the school and killed about 47 school pupils and injured many others during their morning assembly.\textsuperscript{76} Also in April 2014 over 200 Chibok girls were abducted from their school dormitory and to date they have not been found except for some that are reported to have escaped.\textsuperscript{77} The Chibok girls' abduction represented the largest single incident of abduction attributable to the Boko Haram.\textsuperscript{78} The incident attracted international condemnation and led to the famous "#BringBackOurGirls" campaign, which extended even to the White House and continues to this date.\textsuperscript{79}

The north-eastern part of Nigeria, which is being ravaged by Boko Haram, has ordinarily recorded a low literacy level, as it has the highest proportion of out-of-school Children (OOSC).\textsuperscript{80} The Nigerian Demographic and Health Survey 2013 (NDHS)\textsuperscript{81} showed that the north east had the lowest rate of school attendance in Nigeria, as against the south-eastern region, which had the highest. Yobe State in particular had the worst rate among all the states in Nigeria in terms of school attendance for both male and female children in primary and secondary school, with just 12 per cent attendance,\textsuperscript{82} compared to 75 per cent in Imo State in the south east.\textsuperscript{83} A recent study conducted in some schools in Damaturu, the capital city of Yobe State, revealed that the insecurity in the region has caused a further

reduction in school attendance.\textsuperscript{84} Borno State has had the most devastating experience since the Boko Haram insurgency, with a huge negative impact on basic education. Despite the ordinarily low primary and secondary school attendance level in the state (35 and 28 per cent respectively),\textsuperscript{85} a recent study revealed that the insurgency has affected basic education, as school attendance has been drastically reduced owing to attacks on schools which have left many children hurt and the abduction of over 200 Chibok girls, and also because many children and teachers have narrowly escaped death during the attacks on their communities.\textsuperscript{86}

Female education in the north east, which was very poor prior to the insurgency,\textsuperscript{87} has worsened as a result of the attacks on schools and the kidnapping of female students, with some being turned into suicide bombers.\textsuperscript{88} This state of insecurity has forced parents to keep their daughters away from school.\textsuperscript{89} It has been shown that due to the insurgency, and particularly the abduction of the Chibok girls, female students are apprehensive of being kidnapped, thereby causing them to stay away from school.\textsuperscript{90}

The study carried out by Oladunjoye and Omemu\textsuperscript{91} shows that school attendance has been affected mostly in rural areas as they are usually neglected, unlike school attendance urban areas, where the schools enjoy a measure of protection afforded by the security forces. The constant attacks by the sect undermine the effort of government to improve education in the northern region, and no right-thinking parents would want to send their wards to school for fear that they would become victims of the attacks.\textsuperscript{92} Some parents prefer to send their children to neighbouring states that are peaceful, but the masses in the north east, who are counted among the poorest, cannot afford that luxury.\textsuperscript{93} In situations such as this, the children may never return to school or complete their

education even when the insurgency is over, thus diminishing their contribution to their society.\textsuperscript{94}

5.2 Education facilities

Availability, which is one of the essential enablers of education, requires that all of the necessary infrastructure and learning facilities must be in place.\textsuperscript{95} The physical condition of a school has a direct positive or negative effect on a teacher’s morale and effectiveness, and on the general learning environment.\textsuperscript{96} Inadequate educational facilities pose a threat to the right to education. Nigerian schools are ordinarily ill equipped and not conducive to learning,\textsuperscript{97} and the destruction of the available school facilities by the insurgents leaves basic education in a dire situation. Access to basic education in the north-eastern states has been badly affected by the targeted attacks on school facilities by Boko Haram.\textsuperscript{98} According to UNICEF,\textsuperscript{99} over 300 schools were destroyed and 314 children killed between 2012 and 2014.

In Borno, which is the worst hit of all the states, the Executive Chairman of the Borno State Universal Basic Education Board (SUBEB), Bukarkullima,\textsuperscript{100} stated that over 512 schools have been destroyed over the years.\textsuperscript{101} When this is done not only the building but also the teaching materials and the children's school records are destroyed.

The economic burden on the Nigerian government of managing the Boko Haram insurgency has been dire,\textsuperscript{102} and the huge spending on security has had a ripple effect on the funding of other sectors. Despite the importance of education in the development of human capital, excessive defence spending has affected the funding of other sectors including the educational sector.\textsuperscript{103} Nigeria is still struggling to improve the standard of

education, but the meagre resources available are being channelled into rebuilding the schools destroyed by the insurgents.\textsuperscript{104}

5.3 Educational challenges of internally displaced persons (IDPs)

One of the gravest consequences of the Boko Haram insurgency is the large number of people that have been displaced.\textsuperscript{105} The International Organisation for Migration set up a Displacement Tracking Matrix in July 2014 to support the government in collecting and disseminating data on IDPs.\textsuperscript{106} As of December 2015 the total number of IDPs in Nigeria was 2,151,979 individuals, identified in Adamawa, Bauchi, Benue, Borno, Gombe, Taraba, Yobe, Nasarawa, Plateau, Kaduna, Kano, Zamfara and Abuja.\textsuperscript{107} The report also states that 84 per cent of these had been displaced by the insurgency, while others were the victims of communal clashes in the northern region. The majority of the IDPs were identified in Borno (64 per cent), Adamawa (6.32 per cent) and Yobe (6.1 per cent). 92 percent of them live in host communities, while 8 per cent live in the camps.\textsuperscript{108} Children constitute 55.7 per cent of the IDP population and more than half of them are 5 years old or younger.\textsuperscript{109}

As many IDPs are sheltered in schools and humanitarian assistance is limited to life-saving interventions, displaced children are generally unable to pursue their education.\textsuperscript{110} The occupation of the schools by the IDPs and security forces has damaged and destroyed some infrastructure and denied children access to the schools so occupied. An increase in the number of IDPs in Adamawa during the school holidays in September 2014 led to the use of schools as shelters, preventing classes from resuming at the start of the academic year.\textsuperscript{111} Given that education planning does not take account of situations of population increase due to displacement, children are refused attendance at host community schools that do not have the facilities or staff to take on more students. In cases

\textsuperscript{104} Awortu 2015 Research on Humanities and Social Science 217.
where they are accepted, the overstretching of the resources has reduced the quality of education.\textsuperscript{112} Due to their fear of attack or abduction, some parents refuse to allow their children go to school, and they tend to prioritize basic needs such as food and shelter over education.\textsuperscript{113} The children's lack of an occupation could lead them into juvenile delinquency, drug addiction, prostitution and continued destitution.\textsuperscript{114}

In a bid to stem the wave of violations against children in armed conflict, the United Nations Security Council in Resolution 1379 (2001)\textsuperscript{115} authorised the Secretary General to list state and non-state parties responsible for the recruitment and use of children in conflict situations in the annexes to his annual report on children and armed conflict.\textsuperscript{116} The killing and maiming of children and sexual violence against children were added as notable matters in Resolution 1882 (2009),\textsuperscript{117} while recurrent attacks on schools and hospitals were added in Resolution 1998 (2011).\textsuperscript{118} Resolution 1612 (2005)\textsuperscript{119} empowered the Secretary General to establish an enhanced and systemized method of gathering data on violations of the rights of children.\textsuperscript{120} This led to the establishment of the Monitoring and Reporting Mechanism (MRM) with the mandate of gathering accurate, timely, objective and reliable information on the six grave violations of the rights of children in armed conflict by state and non-state actors.\textsuperscript{121}

In July 2014, Boko Haram was listed for two grave violations against children – the killing and maiming of children, and attacks on schools and hospitals.\textsuperscript{122} The listing of Boko Haram triggers a country-specific MRM on

grave violations of the rights of children in Nigeria. In December 2014 the UN formally established a country task force on children affected by armed conflict to monitor and report on violations of the rights of children in Nigeria. The verification of incidents has been challenging, due to the lack of easy access to the affected areas.

6 Nigerian government's response to Boko Haram insurgency

Until recently, the Nigerian government was taking a soft-handed approach in an attempt to engage the members of the Boko Haram in political negotiations, as was done with the Niger Delta militants. In April 2013 former President Goodluck Jonathan established a 26-member Amnesty Committee on Dialogue and the Peaceful Resolution of Security Challenges in the North, with the mandate to convince the Boko Haram sect within three months to surrender its arms in exchange for a state pardon and social integration. The sect, however, claimed that it had done no wrong deserving pardon, and insisted instead on continuing its violent campaign to establish an Islamic State in Nigeria. This attempt, according to Nwankpa, was ill advised, as the religious motivation of the sect is different from the secular demands of the Niger Delta militants.

The Boko Haram sect launched several brutal attacks after its refusal, which led the government on 14th May 2013 to adopt a hard approach by declaring a state of emergency in Borno, Adamawa and Yobe, in an attempt to restore order and reclaim the territories under Boko Haram control. The government established a Joint Task Force (JTF) and deployed 8000 soldiers to the region, which was the largest military deployment since the Nigerian civil war. In 2015 the troops succeeded in reclaiming most of the areas under Boko Haram control. Supported by

126 Agbiboa 2015 Confl Stud Q 11.

132 Agbiboa 2014 Stud Confl Terror 60.
the Nigerian Air Force, the army has launched attacks against Sambisa forest, which is considered to be a major stronghold of the sect, rescuing captives, arresting insurgents and destroying their weapons. The UN High Commissioner for Human Rights (OHCHR), however, has documented a series of human rights violations against Nigerians by the JTF, such as extrajudicial and summary executions, torture, arbitrary detention, enforced disappearances, and rape. They are also reported to have carried out the intimidation of residents, arbitrary arrests and searches, and the burning of houses and shops belonging to civilians. In a fire fight between the JTF and the Boko Haram in Baga, a village on Lake Chad near the Nigerian border with Cameroon, almost 185 people were killed and others were injured. Human rights abuses also exist at the Nigerian military detention facility at Giwa Barracks in Maiduguri, where thousands of Boko Haram suspects (some without concrete evidence to support the suspicion) are detained. Reports exist that due to the overcrowded and unsanitary living conditions, several persons have died, including children. The children there are either being detained along with their mothers, or have been born while in detention.

In reaction to the perceived failure of the Nigerian military to protect civilians against Boko Haram, the local youths of the affected communities in Borno state, armed with rudimentary weapons such as sticks, machetes, daggers, bows and arrows, have mobilized themselves against Boko Haram elements in their communities. The group serves to complement the counter-terrorism efforts of the JTF. The group, which has officially been recognised as the Civilian Joint Task Force (CJTF), due to its numerical strength and local knowledge, has been able to successfully track down some insurgents in their communities, whom they have either killed or handed over to security operatives. They work with

---

the Nigerian soldiers, providing local intelligence, and they man some checkpoints in Maiduguri.\textsuperscript{141} However, they have also fallen as casualties to Boko Haram. In June 2015 a suicide bomber killed three CJTF and injured several others at a checkpoint in Maiduguri.\textsuperscript{142} Hundreds of CJTF members have been killed while trying to prevent bomb-strapped insurgents from detonating their bombs in large crowds.\textsuperscript{143}

\textbf{6.1 Counter-insurgency operations}

It is the right and duty of a State facing insurgency to take counter insurgency measures to ensure public security,\textsuperscript{144} but the United Nations General Assembly in Resolution 60/288 requires such measures to comply with the provisions of international human rights and humanitarian law.\textsuperscript{145} The insurgency as well as the government's counter-insurgency operation has claimed the lives of hundreds of civilians, including children. Rather than calming the situation in the states, the JTF has heightened the fear of the inhabitants. Children have been killed, orphaned and displaced by the activities of the JTF. The failure on the part of the military to protect the citizens led to the CJTF, which now serves as an avenue for the violation of children's rights. Concerned about this problem, the African Commission on Human and Peoples’ Rights in its concluding observation in the Nigeria 5\textsuperscript{th} Periodic Report urged the Nigerian government to ensure that counter-insurgency operations are conducted in full accordance with international and regional human rights standards.\textsuperscript{146}

The Nigerian government appears to have failed in its obligation to ensure that children do not participate in hostilities, as required by the CRC, ACRWC and section 34 of the CRA 2003.\textsuperscript{147} The CJTF, which consists largely of teenagers without basic education, some of whom have lost their

\textsuperscript{142} Anon 2015 http://www.saharareporters.com/2015/06/13/male-suicide-bomber-kills-3-civilian-jtf-members-near-maiduguri.
\textsuperscript{144} Odomovo 2014 Age Hum Rts J 50-51.
\textsuperscript{147} Section 34 of the CRA 2003 prohibits the recruitment of children into the armed forces of Nigeria.
parents and siblings to the insurgency, are on a revenge mission.\textsuperscript{148} According to UNICEF, OHCHR, and the Protection Sector Working Group, children are joining the ranks of the CJTF in increasing numbers and being used in the fight against the insurgency.\textsuperscript{149} Watchlist\textsuperscript{150} noted that the CJTF forcefully recruits young men, and boys as young as 13 years old. Lack of education and an occupation is the reason some of these youths are involved in the fight against the insurgents. As there is no formal process of drafting in members of the group, it is feared that the youths could become new militias if not properly regulated and their activities could incite the Boko Haram into more attacks.\textsuperscript{151} It is disheartening that the government of Borno State gives a monthly allowance to an unorganised group which claims to be fighting the insurgency.\textsuperscript{152}

6.2 Meeting the humanitarian and educational needs of child victims

According to the UN Guiding Principles on Internal Displacement,\textsuperscript{153} and the UN Resolution 46/182 of 1991,\textsuperscript{154} the state has the primary role in the protection and provision of humanitarian assistance to IDPs within its territory. The fact that IDPs remain within the borders of their country means that it is their own government that bears primary responsibility for protecting and assisting them.\textsuperscript{155}

Nigeria has received international support to take care of the increasing needs of those affected by the insurgency. Following the repeated attacks on schools and the abduction of over 200 Chibok girls in 2014, the Safe Schools Initiative was launched by the UN Special Envoy for Global

\textsuperscript{155} Ladan "Strategies for Adopting the National Policy on IDPs" 4.
Education and the former United Kingdom Prime Minister, Gordon Brown, at the World Economic Forum in Nigeria, with an initial donation of $10 million. The purpose of the initiative is to strengthen the #BringBackOurGirls campaign and to ensure that all schools in Nigeria are safe from attacks in the future, as it seeks to build community security groups to promote safe zones for education.

In addition to health, nutrition and other survival needs, including psychosocial services, UNICEF has contributed its own quota to the provision of education to IDP children across the north-eastern region. Through partnership with the government, it has supported the training of teachers. In Yobe, UNICEF has provided temporary learning spaces for the education of IDP children, as well as teaching and learning aids. In Dalori camp in Borno State, the state Coordination Committee supported by UNICEF enrolled 4737 children in school. UNICEF provided pedagogical materials to Borno SUBEB for the children enrolled, and also transport to and from school, to meet parent’s security concerns. It also established two in-campus temporary learning spaces in UNICEF tents for children aged between 3 and 5 years. As of 1 October 2015, 6300 children have been able to undertake schooling in a more appropriate environment through UNICEF school support programmes. Also, the Back to School campaign in Borno and Yobe has led to the enrolment of 170 432 children previously out of school.

The support rendered by these bodies is limited to only some camps, reaching just a fraction of the numbers of IDPs. The major burden lies with the Nigerian government, having regard to its international human rights obligations to address the issues affecting persons displaced by the Boko Haram insurgency. However, the government has not been able to
meet the humanitarian needs of the IDPs, probably because their needs outweigh its current capacity to address them, and also its limited understanding of the rights of IDPs.164 National efforts to respond to displacement and to mitigate its long-term effects on IDPs and host communities tend to be fragmented, uncoordinated and inadequate, and most of the assistance IDPs receive is provided by host communities.165

Most of the IDPs live in host communities with little access to humanitarian support, putting additional strain on the already stretched health, education and social services.166 The IDP camps are witnessing an increasing influx of IDPs who cannot sustain themselves, as host communities are less able to absorb the large crowds. The camps are struggling to accommodate the increasing number of displaced people, who find themselves subject to unhealthy living conditions. Many children are malnourished as no adequate provision is made to feed them.167

The condition of the families displaced as a result of the conflict exemplifies how war can effect a population, and how child development is dramatically altered by war.168 IDPs have been identified as a special category of concern, as they are among the most vulnerable to human rights abuses.169 The ratification of the Kampala Convention places an obligation on the Nigerian government in responding to the Boko Haram insurgency to ensure children’s access to education.170 Though the provision of regular school structures may not be achievable in the short term, concrete efforts must be made to ensure that children do not miss out of education as a result of their being displaced. Nigeria ratified the Kampala Convention in April 2012 and submitted a draft policy on IDPs171 domesticating its provisions to the Federal Executive Council, but to date the policy is yet to be adopted.172

The federal government has failed to make good the rebuilding of the damaged schools in the areas that are safe enough for habitation.

169 Mooney 2005 RSQ 15.
170 Article 9(2)(b) of the Kampala Convention.
171 Federal Republic of Nigeria National Policy on IDPs.
172 Ladan “Strategies for Adopting the National Policy on IDPs” 11.
Reintegration efforts are almost non-existent as a result of the state’s focus on short-term humanitarian responses. Hence, few resources have been dedicated to the pursuit of durable solutions for IDPs to facilitate their return, their local integration or their sustainable settlement elsewhere in the country.\(^{173}\) 

The education of the victims is virtually non-existent in some camps. Of the 78 IDP camps, 33 do not have access to education. In the other 45 camps, 35 have an education facility in the camp, while the other 10 have educational facilities situated outside the camps.\(^{174}\) In an IDP camp in Taraba State, despite having lived there for almost two years, children were found roaming about without any form of education being offered to them.\(^{175}\) In one of the IDP camps in Sangere, Yola State, the schools for IDP children are run by 58 parents who are equally displaced, despite their receiving assistance only from non-governmental organisations and kind-hearted individuals but not from the government.\(^{176}\) 

The problem of corruption, which is endemic in Nigeria, has also reared its ugly head, to compound the burden of the IDPs. The level of exploitation has reached staggering heights as some persons in charge of IDP camps have begun to profit from the situation of the IDPs either through redirecting the funds meant for their care or through inflating their numbers in order to get more funds.\(^{177}\) Recently some high-profile politicians and top military officers were arrested and are currently facing trial over a two billion dollar ($2 billion) arms contract deal which was allocated for the procurement of arms to be used in the fight against the insurgency. This sum was allegedly misappropriated by the office of the National Security Adviser, Colonel Sambo Dasuki, who oversaw the fight against Boko Haram during President Goodluck Jonathan’s administration.\(^{178}\) 

7 Recommendations

The present situation in north-eastern Nigeria as a result of the Boko Haram insurgency calls for urgent intervention. Thus, the Nigerian government needs to take proactive steps to nip the insurgency in the bud so that peace can return to the region. The use of the military in fighting the insurgency is commendable, but the government needs to pursue a more comprehensive strategy that addresses the economic and social roots of the crisis. Measures should address the prevalence of poverty and unemployment and low level of education among youths in the north, because this group is a potential weapon in the hands of the insurgents. The government should expose and bring to justice Boko Haram activists, their funders, and those who are benefitting from the conflict. The Nigerian immigration service needs to be effectively equipped to guard especially the Nigeria-Chad and Nigeria-Cameroon borders to prevent the influx of illegal aliens that support the insurgent group.

As security cannot be promoted at the expense of human rights, the counter insurgency operations should uphold the rule of law and abide by international human rights standards. The military must ensure that it conducts its operations more professionally in order to minimise collateral casualties and damage to livelihoods. There is a need for the adoption of the draft policy on IDPs as the absence of a law and policy framework that clearly defines the roles and responsibilities hampers the coordination of humanitarian and development efforts to mitigate the effects of displacement on children.

Education is a basic right and its availability in emergencies can provide life-saving information, protect children from trafficking, recruitment by armed groups, and psychosocial trauma. In the long term, it can promote peace and post-conflict reconstruction and help young people develop the skills and qualifications that will equip them to live meaningful lives after the conflict ends. Vernor Munoz notes that the humanitarian emphasis on food, health and shelter ought to be extended to the people’s overall welfare, which includes education.

As the emotional, social and physical development of young children has a direct effect on their overall development and on the adults they will

---

180 Courson-Neff "Attacks on Education" 111.  
become, understanding the need to invest in all children is important so as to maximise their future well-being.\textsuperscript{182} Education can help children recover from the post-traumatic effects of armed conflict. A study evaluated a school-based psychosocial intervention in conflict-affected Nepal and showed moderate reductions in general psychological difficulties.\textsuperscript{183} The Nigerian government should thus direct efforts at rebuilding the schools destroyed by the insurgents. The rebuilding of the schools in areas still under attack is not recommended, as they might be razed to the ground again by the insurgents, leading to a wastage of resources. Pending the return of peace to the region the government should attempt to provide basic education to the affected children in the IDP camps and host communities through building temporary school structures, recruiting teachers, providing teaching and learning materials, or through alternative methods such as broadcasting lessons over the radio or establishing classes in safe community spaces.

Further, children should be encouraged to return to school through the provision of scholarships and other incentives as motivation when the insurgency is over. This motivation could be achieved by the establishment of a school structure that is child friendly, which could be achieved through the provision of adequate facilities for play, recreation and meals while at school. There should be adequate provision of security personnel in these schools and also an internal school security system so as to reassure the teachers and the children of their safety.

In addition, the government should provide all necessary support to the children and teachers who were forced to flee the region, towards their rehabilitation and resettlement.\textsuperscript{184} Displacement is a consequence of war which leaves children separated from their loved ones. In this situation they face hunger, sickness, other human rights violations, and even death.\textsuperscript{185} In line with its obligations under the CRC\textsuperscript{186} and ACRWC,\textsuperscript{187} the government should put in place measures to assist children to trace their parents, and thus reunite families who have been separated by the conflict.

\textsuperscript{183} Jordans et al 2010 J Child Psychol Psychiatry 818.
\textsuperscript{184} Article 39 of the CRC.
\textsuperscript{185} Albertyn et al 2003 Paediatric Surgery International 228.
\textsuperscript{186} Articles 9-10 of the CRC.
\textsuperscript{187} Articles 23, 25(2)(b) of the ACRWC.
The government also needs to end the activities of the CJTF, especially the recruitment of children into its ranks. Steps must be taken to ensure that such children withdrawn from the CJTF reintegrate into their communities and get enrolled in school. The Boko Haram insurgents need to uphold their obligations under international law by stopping attacks on schools and returning abducted children to child protection actors for reunion with their families. Where reunion is not feasible, alternative care should be provided appropriate to the situation of a child deprived of parental care.

8 Conclusion

The protection of children affected by armed conflict is the primary duty of states, but the Nigerian government has not been impressive in its response to the humanitarian needs of children affected by the ongoing insurgency. Despite the government's acknowledgement of the importance of education to national development, no significant attempt has been made to ensure the provision of education to children affected by the insurgency. Nigeria has ratified the Kampala Convention and has various relevant commitments under international human rights law, yet the government has failed to provide adequate protection of the children affected by the insurgency. In the face of this, there is need for the government to take proactive steps in line with the recommendations above to ensure a better life for those families affected by the insurgency.
