

vision of a health service in Nqutu fully managed by the Zulu people has been achieved.

The author poignantly describes his disappointment at the decision to disband the regional obstetric service, resulting in a marked deterioration in the perinatal and maternal mortality rates. Noting his own temptation to bitterness and resentment he then writes, 'If I can acknowledge that I am as vulnerable as the next man to become an oppressor – that often indeed, in the insensitivity of privilege, I have been the oppressor – then I can more easily walk in forgiveness and relinquish what I have striven for with great intensity, when it is taken from me. I can more easily give thanks for what has been achieved, for those lives touched with compassion, even when the opportunity for service is no more. I can more easily do what Bishop Zulu advised at that final mission hospital prizegiving and remember that I am called to serve the Lord and people, not the ideologies of governments.'

The Charles Johnson Memorial Hospital begun as, and continues to be, a beacon of light and hope in difficult times. It is a story that was worth recording and reading, and worth reading slowly.

## IN MEMORIAM

### **Kenneth Weinbren (5 March 1923 - 21 May 2010)**

Professor Kenneth Weinbren, distinguished pathologist, passed away in London on 21 May 2010.

He qualified MB BCh at Wits in 1946. As a student he was president of the SRC for two years.

In 1950 he emigrated to England where he had a brilliant academic career. Much of his motivation for leaving South Africa was his strong anti-apartheid stance. In 1957 Wits awarded him an MD degree.

In 1963 he was appointed Reader in Anatomical Pathology at the Postgraduate Medical School, Hammersmith. From 1965 to 1966 he worked at Mount Sinai Hospital, New York, and Stanford University Medical School. In 1967 he was appointed Foundation Professor of Pathology at the new medical school in Nottingham, England. In 1972 he was appointed to the Chair of Anatomical Pathology at the Postgraduate Medical School, Hammersmith.

His special field of research was the mechanism and control of growth and differentiation of cells, with particular reference to the liver.

Kenneth was a cultured man who loved art and theatre. Friends and colleagues remember him as a man of exceptional kindness, who would go to great lengths to help those in need.

Kenneth was married for many years to Valerie, who predeceased him. He leaves four sons and grandchildren.

**Professor C Isaacson**

### **The ESSENTIAL REFERENCE for every healthcare professional!**

The carefully and thoroughly updated 9<sup>th</sup> edition of the South African Medicines Formulary (SAMF) can now be ordered. It is your essential reference to rational, safe and cost-efficient use of medicines. That is why you should not prescribe without it.

The newly published SAMF provides easy access to the latest, most scientifically accurate information – including full drug profiles, clinical notes and special prescriber's points. The convenient pocket-size design enables you to fit it comfortably into your bag or hospital coat pocket – always at hand for ready reference.

### **WHY YOU SHOULDN'T BE WITHOUT THE SAMF 9<sup>TH</sup> EDITION**

The new 9<sup>th</sup> edition of SAMF provides expanded information on key issues facing South African healthcare professionals today, including antiretrovirals, TB treatment guidelines, management guidelines for asthma and chronic heart failure, other common chronic conditions and prescribing in sport.

- It presents practical, new approaches to the management of venomous bites and stings.
- It outlines extensively the acute adverse reactions to drugs of abuse, and their management.
- It features new as well as existing drugs, indexed by both trade and generic names.
- It offers fresh insights into informed prescribing and carries cautionary guidelines on drug interactions and a range of special risk patients and conditions.

And, as always, you can rely on...

- the professional compilation and editing by a team from the Division of Clinical Pharmacology, UCT
- an independent and unbiased guide on prescribing in South Africa today
- the indication of agents included in the SA and WHO essential drug lists
- support of the SA national drug policy
- guidance for prescribing during pregnancy and lactation, and in patients with porphyria, liver disease and renal impairment (including tables with drug dosage adjustments); and
- indexed and page tabs for quick and easy access to each section.

**YOUR SATISFACTION IS GUARANTEED**

#### **3 easy order options:**

1. PHONE EDWARD OR BYRON – 021 6817000
2. FAX the completed SAMF order form to 0866006218
3. EMAIL: [edwardm@hmpg.co.za](mailto:edwardm@hmpg.co.za) OR [byronm@hmpg.co.za](mailto:byronm@hmpg.co.za)
