

Celebrating 50 years of heart transplant surgery: A missed opportunity to honour Hamilton Naki

To the Editor: The authors of the guest editorial ‘The world’s first human-to-human heart transplant at Groote Schuur Hospital: 50 years later’^[1] wish to acknowledge the letter to the Editor by Mankahla *et al.*^[2] addressing the omission of Mr Hamilton Naki from the invited commentary. This oversight was indeed a missed opportunity to once again honour Mr Naki’s contribution to laboratory research at the University of Cape Town in a local journal. It is with pride that we refer readers of *SAMJ* to our article published concurrently in the *European Heart Journal*,^[3] which honours Mr Naki’s formidable surgical skills despite a lack of formal training and recognises his contribution in training a future generation of surgeons.
